Subject: complaint

Respectfully, after 10 long years, Hundreds of Millions of Dollars, we at times wonder how much dialogue with EPA Region 8 (and EPA's nvironmental Restoration)
it will require to fix the apparently growing list of concerns in this area declared a NATIONAL EMERGENCY and DEADLIEST SUPERFUND IN US HISTORY :

- 1)Premature EPA Records Of Decision's on Operating Unit 1(OU1) nd OU2
- 2) Toxic Storage site at OU3 that has not been appropriately placed orproperly capped, contained, abatedor mitigated (see attached photo of OU3)
- 3) Absence of the promised "Silver Bullet"Risk Assessment for OU4(City of Libby) hich must be PEER REVIEWED,nd PEER REVIEWS for OU 1 and OU2 Risk Assessments
- 4) Improper treatment or mistreatment of private homeowners and their roperties during a Public Health Emergency
- 5) Dangerous Decisions on a multitude of removal and storage issues
- 6) Inappropriate management of the Rainy Creek area, including the dangerousmpitheater and apparent

continued pollution of roads and public waterways

7) Rudimentary and conflicting Public Presentations by EPA Region 8's Head of Toxicology and Management Team

8) Neglect or Non Support of Libby Community Advisory Group and any other majority represented group

9) Contaminated Bark from OU5 being shipped and sold throughout the United States AFTER testing positive for toxic material.

10) Administrative declarations during the past year such as;

...if people aren't nice to uswe "won't want to help Libby" (Jim Martin)

" Libby's been breathing that stuff a long time" (Carol Campbell)

" There will be some detractors here tonight, when I give you the sign, cut the mike.." (Ted Linnert, Community Involvement Coordinator)

<http://www.epa.gov/ciconference/previous/2006/download/presentations/marketing.pdf>

The residents of Libby must accept and then adopt the so-called products or messages of our campaign) be it the buy-in that there is a problem, be it the acceptance of our cleanup plan, or be it the adoption of some behavior modification, for example adopting and acting in accordance with whatever institutional Controls we leave in place after we're gone...EPA, TED LINNERT, SONYA PENNOCK EPA R8 Community Involvement

- > ur group has asked EPA rapidly over the last few weeks to
- > identify where the (toxic) bark from OU5 was shipped as well as how much was shipped
- > and what they intend to do about it. We have had no reasonable
- > response on an issue we believe is a real threat to public health and safety
- > as well as a waste of federal money with regard to the
- > contamination of Libby.
- > we are considering filing a special complaint on this issue, please advise.
